

Stahly Family Dentistry News—Spring 2008

Spring is a time for change and here at Stahly Family Dentistry things are going along with the season. We have some new faces involved with the practice and all are adjusting just fine. Please rest assured that patient service, care and comfort are all still high priorities in our practice. If the service and care is not up to your expectations, please contact anyone in the office, even anonymously if you wish. Your concerns will be addressed in a timely manner.

Speaking of patient comfort, we now offer oral sedation dentistry in the practice. The procedure involves taking oral medicines in the office prior to beginning your dental work. You are then relaxed and ready for the work to begin!! The sedation is ideal for people who have trouble scheduling work due to apprehension or people who have trouble sleeping the night before dental work due to anxiety. Please speak with anyone in the practice to learn more about how sedation can work for you.

Finally, we have done some work with the website. Obviously you have found the site if you are reading this article but we would love to hear feedback on what you like or dislike about the site and how you found the address. We would also like to hear ideas on how we can use the website in the future to benefit your dental experience. Please keep our front desk updated with not only your current address and phone numbers (including cell) but also your e-mail address. Thanks for reading and keep on smiling!!

Sincerely,

The Staff at Stahly Family Dentistry
