

Practice News - April 2005

Kim Conwell and Patty Deaver, both certified Expanded Duties Dental Assistants, have recently become recertified in Healthcare Provider CPR. All staff and Dr. Stahly stay current with the latest updates in emergency safety by taking a course every 2 years. Included is a hands on and written exam to earn a compliance card.

A new x-ray machine was recently purchased and installed in the room reserved for teeth cleanings with the hygienist. The machine incorporates the latest in safety and technology and can easily be used for digital x-rays in the future.

Our practice utilizes a patient financing company that is an interest free way to help pay for dental care. Care Credit easily sets up monthly payments and the program can be applied for online for faster results. Call Mary Ann in our front office or see the related link on this website.

Our internet special this month is tooth bleaching. Mention this article and that you saw it online and receive 50% off our take home bleaching. This offer is only good for qualified patients in the absence of dental decay and gum disease. Benefits and risks of bleaching will be explained before treatment will begin.
